- RabbitMQ
- Elasticsearch
- MySQL

LANGUAGE SKILLS

- English

Pre Intermediate

ABOUT ME

In my work as a programmer, I strive to solve problems with attention, accuracy and clarity. I like to get involved in projects of various sizes, scope and professional challenges while learning new technologies.

As a hobby, I am working on an application based on Symfony 6.4 using the OpenAI model GPT3.5. Its goal is to generate content containing a description of a movie or TV series and its selection according to the user's preferences.

WORK EXPERIENCE

DBMS Sp. z o.o | 12.2016 – current

Senior PHP Developer

- Designing a sales intelligence tool to support B2B lead acquisition processes since its creation as a PHP Developer, with 5 years in the key role of DevLeader
